EXPERIENCE

Cebu Institute of Technology - University   **2025 - Present**
AI-Driven Adviser Evaluation System (Capstone Project)
Student Developer   *Cebu City - Cebu*

- Built a web-based adviser evaluation system using React.js (frontend) and Spring Boot (backend).
- Designed interactive forms for student submissions and adviser review.
- Managed MySQL database design and integration for efficient data storage.
- Collaborated with a team using Git/GitHub: branching, merging, and conflict resolution.
- Enhanced UI/UX for responsiveness and implemented dashboard analytics for evaluation summaries.

Cebu Institute of Technology - University   **2023 - 2024**
Student Health Counseling System (Information Management)
Student Developer   *Cebu City - Cebu*

- Developed a web application for student health records using Django and HTML/CSS/JS.
- Created forms for health record entry, appointment booking, and consultations.
- Designed dashboards for counselors to track health status and appointments.
- Integrated MySQL database for secure and organized storage of sensitive data.
- Ensured responsive design and user-friendly interface for both students and counselors.
- Ensured responsive design and user-friendly interface.

EDUCATION

Cebu Institute of Technology - University   **Expected Graduate: mid-2026**
B.S. in Information Technology   *Cebu City - Cebu*

Catarman National High School   **Graduated: 2019**
High School Diploma   *Catarman Northern Samar*

Skills & Interest

- **Technologies:** Proficient in web and mobile development tools including React.js, Django, Spring Boot, MySQL, HTML, CSS, JavaScript, and Android (Java/Kotlin).
- **Skills:** Experienced in UI/UX design, database integration, API development, project collaboration using Git/GitHub, and building interactive dashboards.
- **Interests:** Passionate about gaming, exploring technology, fitness challenges, creating interactive web and mobile projects, and continuously learning new skills.
